

Guide: Convert React Math Game to Android App

1. Install Requirements Node.js Android Studio Java JDK 11+ Git (optional)
2. Build Your Web App Run the following commands inside your React project: `npm install npm run build`
3. Add Capacitor `npm install @capacitor/core @capacitor/cli --save npx cap init "MathGame" "com.yourname.mathgame" --web-dir=build npx cap add android npx cap copy android npx cap open android`
4. Build APK in Android Studio Open the project using: `npx cap open android` Run the app on emulator or device Build APK: Build → Build Bundle(s) / APK(s)
5. Generate Signed APK/AAB Use Android Studio to generate a signed release build for publishing on Google Play.

Done! You now have a complete guide.
